ABOUT ME

Though I have been an actor in serials, movies and short films which came my way, I still wait for the right character to bring out the best in me. I look forward to focus in acting as a main stream career.

I currently see the lacuna in actors who would fit into middle age characters in South Indian Cinema and I would prefer to be in such supporting cast and antagonist characters, to which I can bring out the best of the roles and in me. My aptitude to handle different languages with ease in its natural spoken style, would be an added advantage.

My looks and tall stature (6'3") would make the characters stand out well. Being a voice coach / artist, and a dubbing artist, I am adept in dubbing in different languages and accents, to suit the character.
